B7FP

Valliscor offers a platform of custom reagents for addressing our customers' C₁-C₃ fluoroalkylation needs - including commercial scale quantities (>100 kg) of **bromofluoromethane** (BFM, CAS # 373-52-4), **dibromofluoromethane** (DBFM, CAS # 1868-53-7) and **dibromodifluoromethane** (DBDFM, CAS # 75-61-6). For medicinal chemists, we offer lab scale quantities of fluoroiodomethane (FIM, CAS # 373-53-5) and difluoroiodomethane (DFIM, CAS # 1493-03-4).

We are well-versed in addressing the regulatory hurdles regarding **ozone-depleting substances** (including with the **US EPA** & the **EU Climate Action**), the **Montreal Protocol** and shipping around the globe.

Make sure to visit our **products webpage** for a more extensive listing of all available products. In addition to the products listed here, we welcome specific inquiries. Please **contact us** for custom fluoroalkylation reagents and **services** to meet your needs.
